

Knowledge Engineering

Integration Laboratory

Mission Statement

KEIL

To support the Assistant Secretary of the Army (Acquisition, Logistics & Technology) (ASA (ALT)) in its role as the Army Executive Agent for Systems Architecture through the development and delivery of quality products, services and technologically superior tools by:

- Developing and maintaining Army Tactical and Domain enterprise Systems Architecture data driven products that are Department of Defense Architecture Repository System (DARS) compliant.
- Maintaining a community web presence for all Systems Architecture products and dynamic database reports.
- Assisting in all Systems Architecture validation and configuration management tasks.
- Providing expertise to all Domain and other proponent agencies developing Systems Architecture products.
- Providing a hardware lab for the integration of new software/hardware, mission thread validation and architecture engineering validation for all Army Systems Architectures.
- Building and maintaining Strategic Alliances to facilitate the development of Army Enterprise System Architectures.
- Assisting with the transition of tactical Army Systems Architectures from a Common Operating Environment (COE) to a Net Centric Enterprise Services (NCES) based Architecture.
